

Creating solutions driven by the user community

Our strength lies in gathering heterogeneous ideas to explore new boundaries.

[DISCOVER HOW](#)

Who we are

We deliver domain driven technology solutions in the Banking and Financial Services sector.

Our solutions are based on an understanding of our clients' specialized needs. From defining an outcome to a successful closure, we help them establish strong footholds in the changing global economy. Our experts, with many years of industry experience keep Hexagon Global informed and willing to change with the times. Our offerings are built for an expanding workspace and strive to manage by exception to improve operational efficiency.

An organization owned by employees – so everyone has a say.

Manage your risk, while we manage the rest

We would like to walk the future with you. Staying one step ahead means that we can provide safer systems that help you manage risk without worrying about peripheral issues. We are equipped with learnings from the past, our user community's knowledge and foresight of future trends. Our BFSI solutions are now a reality that will make your life easier.

Hexagon mPower

End to End

Hexagon mPower Enterprise is our end to end flagship investment management product that comprehensively covers front-to-back office requirements. Designed to double operational efficiency and provide an unmatched user experience, Front office, Mid office, Back office activities are functionally segregated to provide adequate checks and balances.

Front Office

Hexagon mPower Front Office supports decision making, trade origination & trade flow confirmation. Pre-trade compliance is weaved throughout the trade flow at appropriate trade points. A scenario analyzer verifies the impact of trades on compliance & exposure. Portfolio metrics are also a crucial part of this product.

Back Office

Hexagon mPower Back Office receives trades from various origination points and houses them. The product performs 'allowed' trade adjustments and also fulfills any period end audit observations. Accounting, valuations & income as well as post trade compliance are automated based on various factors.

What sets us apart

Smart & Relevant

We have a strong team of domain experts, who are able to quickly relate to client's pain areas. Our 'Management by Exception' rule enables firms to focus on tasks that require attention and human intervention, while our solutions take care of the rest. This means that users do not have to compromise coverage or rely on tedious coding mechanisms

Insightful & Intelligent

A User Community Model of product creation has been implemented. Practitioners are active participants the creation process, validating business relevance & ensuring usability. This provides us with a rich source of heterogeneous ideas that are quarried to explore previously unknown boundaries and used to bring new age practices to the forefront.

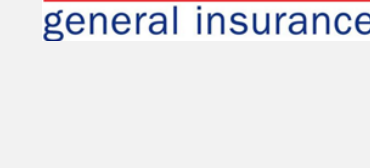

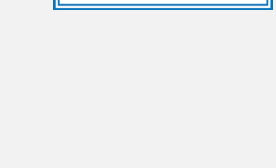

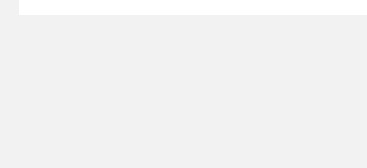

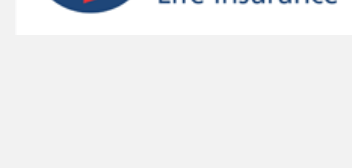

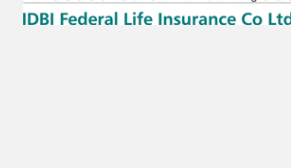

Simple & Reliable

Equipped with strong technical expertise, our core focus has been to create products and platforms keeping 'exceptional user experience' in mind. Our systems are easy to use and have a great response time. Striving to maintain high operational efficiency, multi-device operations and intelligent alerts enable quick decision-making anytime, anywhere.

Configuration vs. Customization

A key focus when building our products has been to demystify and simplify core processes. One such area is compliance. In order to adhere to changing regulations, we believe that business workflows and rules must be externalized and not hard-wired into the system. Our products enable users to configure business rules in sync with market needs, while optimizing their human bandwidth.

Hexagon Global was able to quickly understand and priorities, utilize their domain & functional knowledge to conceptualize, configure, design & implement dashboarding and reporting solution to our full satisfaction. They have exceeded our expectations and we would not hesitate to use their services in the future.

Vaibhav Joshi, Asst. Vice President,
HDFC Asset Management Company Ltd.
